

Pentago

Pentago is a 2-player strategy game in which players face off to outsmart their opponents by placing marbles on a 6×6 playing board.

Every turn, a player places a marble of their color in an unoccupied spot on the game board, and then rotates one quadrant of the board 90° clockwise or counterclockwise.

A player wins when they make a straight chain (vertically, horizontally, or diagonally) of length 5 or more. The game is insidious, but endlessly playable and fun every time.
